

The Public comment period starts on October 1, 2009 and will end on November 2, 2009. Comments should be submitted to:

Dennis R. Downs,
Executive Secretary
Utah Solid and Hazardous Waste Control Board
Department of Environmental Quality
P.O. Box 144880 SLC UT 84114-4880

Comments can also be faxed to 801-538-6715 or sent by electronic mail to: swpublic@utah.gov and should include in the subject line: *Public comment on hw rules*, with attachments submitted as ASCII (text) files or in pdf format, by 5:00 PM on November 2, 2009.

For more information about the Proposed Hazardous Waste Rules, please contact **Susan Toronto or Don Verbica** at 801-538-6170 or email at storonto@utah.gov.

R315-1-1

This proposed rule change adopts the federal definition of "gasification" into the state hazardous waste rules.

R315-2

This proposed rule change amends an existing exclusion to the definition of solid waste that applies to oil-bearing hazardous secondary materials generated at a petroleum refinery when these materials are recycled by inserting them back into the petroleum refining process and certain other conditions are met. This rule change expands the exclusion from the definition of solid waste of fuels to include certain hazardous secondary materials called "emission comparable fuel". Finally, this rule change establishes an alternative set of generator requirements applicable to laboratories owned by eligible academic entities and addresses the specific nature of hazardous waste generation and accumulation in these laboratories.

R315-5

This proposed rule change establishes an alternative set of generator requirements applicable to laboratories owned by eligible academic entities that address the specific nature of hazardous waste generation and accumulation in

these laboratories. The proposed change also requires that manifests provide all information that federal regulations require manifests to contain.

R315-8

This rule change clarifies compliance monitoring provisions and corrects typographical errors and omissions from a previous rule published by EPA in the Federal Register on 10/12/2005.

R315-13-1

This rule change defers the requirements that polychlorinated biphenyls (PCBs) be considered a constituent subject to treatment (CST) when they are present in soils that exhibit the Toxicity Characteristic for metals. Generators are still required to treat contaminated soils to meet land disposal restrictions (LDR) standards for all hazardous constituents except PCBs. Generators also are required to treat PCBs if the total concentration of halogenated organic compounds in the soil equals or exceeds 1,000 parts per million.

R315-14-7

This rule change clarifies several compliance and monitoring provisions. It also corrects several omissions and typographical errors in amendments EPA made to the national emission standards for hazardous air pollutants for hazardous waste combustors which were promulgated on 10/12/2005.

R315-50-1

This rule change eliminates instructions for completion of a manifest form. The requirements for this information are now incorporated by reference from the federal regulations.
